RieNu is a 100% Recycled Polyester Linen.

Riegel is now offering an eco-friendly polyester table linen. Produced from Certified 100% Post Consumer Recycled Polyester, RieNu table linens by Riegel look, feel, and perform as brilliantly as our current Premier polyester.

Simply put, our RieNu fabric is made from recycled plastic bottles. In fact, ONE 20 x 20 napkin eliminates THREE unused 16 oz. plastic bottles from our earth's landfills. That's doing our part to protect the earth. **Now it is your turn.**

RieNu the earth with Riegel. Contact your sales representative for more information.

Bales of plastic bottles are collected, sorted, and inspected to eliminate foreign materials.

The plastic chips are melted down and then extruded into a new fiber.

PET bottles are sterilized, dried, and crushed into small chips.

The finished fiber can then be dyed and sewn into napkins and tablecloths in a variety of colors.
